INTRODUCTION

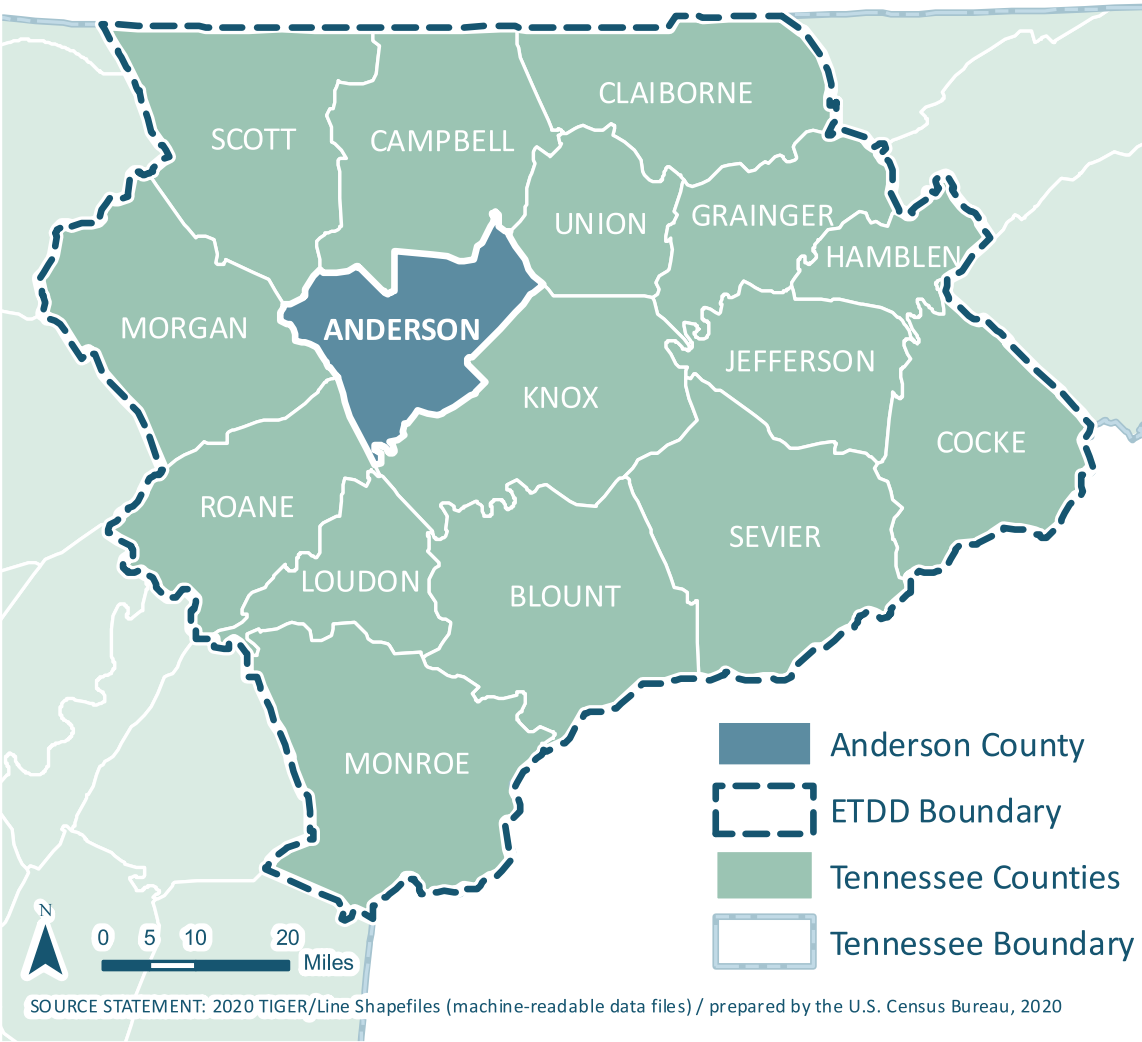

This report is part of a series, which examines statistical data from U.S. Census materials regarding economic and demographic characteristics in fifteen of the sixteen counties that make up the East Tennessee Development District. The series utilizes data from U.S. Decennial Censuses along with American Community Survey Five-year Estimates as its primary sources. The counties in the District are Anderson, Blount, Campbell, Claiborne, Cocke, Grainger, Hamblen, Jefferson, Knox, Loudon, Monroe, Morgan, Roane, Scott, Sevier, and Union. Knox County will not be covered in this series.

Topics that will be discussed in this summary report for Anderson County are

- population growth from 1950 to 2020;
- population density;
- demographic characteristics in terms of sex, race, and age;
- economic characteristics in terms of family income, household income, per capita income, and poverty status of families;
- employment classification according to industry;
- labor force characteristics in terms of place of work and commuting patterns;
- educational level of the adult population;
- and housing characteristics in terms of age of the housing stock and type of tenure.

Loudon	374	1.2%
All Other Locations	3,539	11.4%
Total Out-Commuting Jobs	31,135	

Notes: This LEHD Origin-Destination Employment Statistics (LODES) dataset is a partially synthetic dataset that describes geographic patterns of jobs by laborers' employment locations and residential locations, which can be used to identify small-area workforce characteristics. A job is counted if a laborer is employed with positive earnings during the reference quarter as well as in the quarter prior to the reference quarter. This is called a "beginning of quarter" job under the assumption that the laborer was employed on the first day of the reference quarter.

* This number represents the count of Anderson County jobs worked by Anderson County residents.
